

To whom it may concern, I would like to comment on the campaign for Localism and the priority it will be given over national and regional service using the current FM translator service.

This campaign is a serious matter to me, my family and my community. If this issue is passed, I would no longer be able to receive the transmission of a radio station I listen to daily. K-Love radio station is the primary radio station my family and I listen to. I feel relief that we can listen to music without being bombarded by sexual innuendos and other suggestive, inappropriate topics other radio stations routinely transmit during the peak hours of my children's listening time. The message K-Love transmits is Always positive, Always uplifting and never makes me wish I had not turned on the radio.

The K-Love broadcast also provides important services to our local community. One way in which K-Love is important to the community is the broadcasting of local community activities, many of which encourage community "team work" such as the American Heart Association Heart Walk. A second example of K-Love's importance to our community is their providing broadcasting of those activities at no charge to the organization as long as it is a non-profit activity. This service is even available to our local youth groups such as Boy Scouts, Venture Crew, etc. Speaking from personal experience, K-Love provided free advertising for a local blood drive on behalf of a Venture Crew member working on his Eagle Scout badge.

Please consider my comments and do not allow Localism to take away such an important broadcast service from our local community!

Sincerely,  
Terri Cousins-Yaqoub
